

HYERI YOH

Postgraduate Researcher, Cognition Lab
Department of Psychology, Yonsei University
50 Yonsei-Ro, Seodaemun-gu, Seoul 03722, Republic of Korea
yhyeri514@yonsei.ac.kr | +82-10-7471-6755 | hyeriyoh.github.io

EDUCATION

M.S. in Cognitive Science 2023 - 2025
Yonsei University, Seoul, Republic of Korea
Thesis: Temporal Interitem Relations in Visual Working Memory (PI: Dr. Min-Shik Kim)
GPA: 4.27 / 4.3

B.A. in Psychology 2018 - 2023
Yonsei University, Seoul, Republic of Korea
GPA: 4.04 / 4.3

RESEARCH EXPERIENCES

Postgraduate Researcher

Mar 2025 - Present

Cognition Lab, Dr. Min-Shik Kim, Dept. of Psychology

Coexisting Spatial and Temporal Regularities in Visual Statistical Learning

Research Aim: Investigating how spatial and temporal regularities are independently acquired when they co-occur in the presence of unpredictable noise stimuli

- Designed a novel paradigm embedding spatial and temporal regularities across two successive displays
- Programmed experimental tasks in PsychoPy; ongoing data collection and analysis

Meaningful Objects and Temporal Structure in Visual Working Memory

Research Aim: Examining whether prior knowledge of real-world objects modulates the use of relative temporal order as a cue in VWM

- Extended my published paradigm (Yoh & Kim, 2026) to meaningful real-world objects
- Contributed to designing conditions that test how semantic and temporal structure jointly shape VWM representations (second author)

Identifying the Structure of Social Interaction Perception

In collaboration with Dr. Sang Chul Chong, Dept. of Psychology & Graduate Program in Cognitive Science

Research Aim: Investigated the visual and semantic structure underlying social interaction perception

- Compiled experimental stimuli and conducted exploratory analyses
: word tokenization, semantic co-occurrence network analysis, spatial clustering analysis
- Cross-cultural collaboration with researchers at Yonsei University and the University of British Columbia

Graduate Student Researcher

Mar 2023 – Feb 2025

*Cognition Lab, Dr. Min-Shik Kim, Dept. of Psychology*Temporal Structure in Visual Working Memory: Contributions of Relative Order and Item-Interval Associations

Research Aim: Examined how two components of temporal structure,

relative order and item–interval associations, shape VWM representations

- Conceptualized and programmed experiments, conducted data analysis
- Developed a novel paradigm for systematic manipulation of absolute and relative temporal order
- Presented at OPAM 2024 and domestic conferences (Best Poster Award); published in *Cognition* (2026)

Beyond Faces: The Effect of Contexts on Ensemble Emotion Perception*In collaboration with Dr. Sang Chul Chong, Dept. of Psychology & Graduate Program in Cognitive Science*

Research Aim: Investigated how background and observer emotion modulate ensemble perception of crowd emotion reflecting real-world contexts

- Constructed stimulus sets by curating and quantifying real-world photographs
- Conducted statistical analysis using Bayesian GLMMs and location-scale models
- Presented at VSS 2026; published in *Attention, Perception, & Psychophysics* (2026) (co-first author)

Characterizing Features Underlying Relational Memory: Machine Learning Insights into Brain Structure

Research Aim: Explored how feature identification in relational memory relates to hippocampal and prefrontal structures using machine learning

- Developed research questions and processed Human Connectome Project (HCP) data
- Programmed and implemented machine learning analyses: Clustering and Random forest

RESEARCH GRANTS & FUNDING

-
- | | |
|----------------|--|
| 2026-29 | Researcher, <i>Institute of Information & Communications Technology Planning & Evaluation (IITP)</i>
Project: Development of AI memory mechanism that reflects human cognitive principles
PI: Dr. Min-Shik Kim (6-institution collaborative grant) |
| 2026-28 | Researcher, <i>National Research Foundation of Korea (NRF)</i>
Project: Mechanisms in Working Memory
: An Integrative Investigation of Functional States and Individual Differences
PI: Dr. Min-Shik Kim |
| 2025-26 | Researcher, <i>Yonsei Institute for AI and Social Innovation – 2025 Research Support Program</i>
Project: Human-Centered Social AI Implementation
: Prompt Engineering Based on Behavioral, Gaze, Language, and Cultural Data
PI: Dr. Sang Chul Chong |
| 2023-24 | Researcher, <i>National Research Foundation of Korea (NRF)</i>
Project: Understanding of multidimensional attention mechanisms
and development of attention enhancement techniques
PI: Dr. Min-Shik Kim |

PUBLICATIONS

Yoh, H., & Kim, M.-S. (2026). [Temporal Structure in Visual Working Memory: Contributions of Relative Order and Item-Interval Associations](#). *Cognition*, 273, 106531.

Lee, W[†]., **Yoh, H[†]**., & Chong, S.C. (2026). [Beyond faces: The effect of context on ensemble emotion perception](#). *Attention, Perception, & Psychophysics*, 88(7), 194. (*Equal contribution)

PRESENTATIONS

Lee, W[†]., **Yoh, H[†]**., & Chong, S.C. (2026, May). Beyond Faces: The Effect of Contexts on Ensemble Emotion Perception. Poster presented at *the 26th Vision Science Society*, St. Pete Beach, Florida.

Yoh, H., & Kim, M.-S. (2024, November). Temporal Interitem Relations in Visual Working Memory Poster presented at *the 32nd Annual Meeting of the Object Perception, Attention, and Memory (OPAM) Conference*, New York, NY.

Yoh, H., & Kim, M.-S. (2024, August). Temporal Structure in Visual Working Memory: Absolute or Relative? Poster presented at *the 78th Annual Conference of the Korean Psychological Association*, Gyeongju, Republic of Korea. – Recipient of Best Poster Award

Yoh, H., & Kim, M.-S. (2024, February). Temporal Order Information in Visual Working Memory: Absolute or Relative? Poster presented at *the 2024 Annual Conference of the Korean Society for Cognitive and Biological Psychology*, Seoul, Republic of Korea.

HONORS & SCHOLARSHIPS

Honors & Awards

- | | |
|----------------|--|
| 2024 | <i>Best Poster Presentation Award</i>
78th Annual Meeting of the Korean Psychological Association |
| 2022-23 | <i>Highest Honors for Academic Achievement</i>
Yonsei University (Fall 2021, Fall 2022) |
| 2021 | <i>Honors for Academic Achievement</i>
Yonsei University (Spring 2021) |

Scholarships

- | | |
|----------------|---|
| 2023-24 | <i>International Student Support Assistant Scholarship</i>
Yonsei University (Fall 2023, Fall 2024) |
| | <i>Teaching Assistant (TA) Scholarship</i>
Yonsei University (Fall 2023, Spring 2024) |
| | <i>Graduate Student Research Assistant (GSRA) Scholarship</i>
Yonsei University (Spring 2023, Fall 2024) |
| 2021-22 | <i>Yonsei Merit-based Scholarship</i>
Yonsei University (Fall 2021, Spring 2022, Fall 2022) |

ASSISTANCE EXPERIENCES

Teaching Assistant

Experimental Methodology in Psychology (2023); *Cognitive Psychology* (2024)

- Facilitated TA sessions in English, advising students on experimental design and statistical analysis
- Designed and administered assessments

Graduate Student Research Assistant (2023 – 2024)

- Managed lab administrative operations including budgeting and documentation

BK21 (Brain Korea21) Program Research Assistant (2025)

- Compiled departmental data and drafted University's annual evaluation report

International Student Support Assistant (2023 – 2024)

- Provided academic advising and supplemental sessions for international psychology students

ACADEMIC & COLLABORATIVE ACTIVITIES

Chat but Better – English Research Discussion Group (2025 – 2026)

- Joined an English-only research discussion with graduate students across psychology subfields
- Presented research, participated in discussions, and practiced academic communication in English

Journal Club (2023 – 2024)

- Organized and led journal clubs on key topics in cognitive psychology, followed by group discussions

Python & MATLAB Programming Workshop (2023 – 2024)

- Designed a structured template of experiment code and analysis pipeline, enabling peers to adapt it for their own projects

SKILLS

Statistical Analysis

- Data preprocessing, statistical analyses, and visualization using **R**, **JASP**, and **Python**
- **Bayesian modeling**: GLMM, model comparison, location-scale model, and segmented regression

Experimental Stimuli Design

- Designed and conducted a range of cognitive tasks using **PsychoPy**
- Controlled and normalized visual features using **MATLAB**

Machine Learning & Data Analysis (Python & Jupyter Notebook)

- Applied machine learning methods (PCA, SVM, clustering, random forest) and analyzed text responses through tokenization, embedding, and network modeling
- Conducted facial recognition and emotion classification using RetinaFace and DeepFace

Language

- Korean (Native), English (Fluent)
