HYERI YOH

Graduate Researcher, Cognition Lab
Department of Psychology, Yonsei University
50 Yonsei-Ro, Seodaemun-gu, Seoul 03722, Republic of Korea
yhyeri514@yonsei.ac.kr | +82-10-7471-6755 | hyeriyoh.github.io

EDUCATION

M.S. in Cognitive Science — 2023 - 2025
Yonsei University, Seoul, Republic of Korea
Thesis: Temporal Interitem Relations in Visual Working Memory
(PI: Dr. Min-Shik Kim)
GPA: 4.27 / 4.3

B.A. in Psychology — 2018 - 2023
Yonsei University, Seoul, Republic of Korea
GPA: 4.04 / 4.3

RESEARCH EXPERIENCES

Graduate Researcher — Mar 2025 - Present

Cognition Lab, Dr. Min-Shik Kim, Dept. of Psychology

Identifying the Structure of Social Perception

In collaboration with Dr. Sang Chul Chong, Dept. of Psychology & Graduate Program in Cognitive Science

Research Aim: Investigated the visual and semantic structure underlying social interaction perception

- Compiled experimental stimuli and conducted exploratory analyses
  : word tokenization, semantic co-occurrence network analysis, spatial clustering analysis
- Cross-cultural interdisciplinary collaboration: cognitive & social psychology, applied statistics
  ; Yonsei University, University of British Columbia

Graduate Student Researcher — Mar 2023 – Feb 2025

Cognition Lab, Dr. Min-Shik Kim, Dept. of Psychology

Temporal Structure in Visual Working Memory: Contributions of Relative Order and Item-Interval Associations

Research Aim: Examined how two components of temporal structure,
relative order and item–interval associations, shape VWM representations

- Conceptualized, programmed, and executed experiments
- Developed a novel paradigm for precise temporal order control
- Analyzed data, presented results at conferences, and drafted a manuscript

Beyond Faces: The Effect of Contexts on Ensemble Emotion Perception

In collaboration with Dr. Sang Chul Chong, Dept. of Psychology & Graduate Program in Cognitive Science

Research Aim: Investigated how background and observer emotion modulate ensemble perception
of crowd emotion reflecting real-world contexts

- Designed experimental stimulus sets by manipulating real-world photographs

- Conducted statistical analyses using Bayesian GLMMs and segmented regression
- Extended and completed this project after graduation

Characterizing Features Underlying Relational Memory: Machine Learning Insights into Brain Structure

Research Aim: Explored how feature identification in relational memory relates to hippocampal and prefrontal structures using machine learning

- Developed research questions and processed Human Connectome Project (HCP) data
- Programmed and implemented machine learning analyses: Clustering and Random forest

RESEARCH GRANTS & FUNDINGS

2025-26 Researcher, *Yonsei Institute for AI and Social Innovation – 2025 Research Support Program*
Project: Human-Centered Social AI Implementation
: Prompt Engineering Based on Behavioral, Gaze, Language, and Cultural Data
PI: Dr. Sang Chul Chong

2023-24 Researcher, *National Research Foundation of Korea (NRF)*
Project: Understanding of multidimensional attention mechanisms and development of attention enhancement techniques
PI: Dr. Min-Shik Kim

PUBLICATIONS

Yoh, H., & Kim, M.-S. (2026). Temporal Structure in Visual Working Memory: Contributions of Relative Order and Item-Interval Associations. *Cognition*.

Lee, W†., **Yoh, H**†., & Chong, S.C. (in preparation). Beyond Faces: The Effect of Contexts on Ensemble Emotion Perception. (†Equal contribution)

PRESENTATIONS

Yoh, H., & Kim, M.-S. (2024, November). Temporal Interitem Relations in Visual Working Memory Poster presented at the 32nd *Annual Meeting of the Object Perception, Attention, and Memory (OPAM) Conference*, New York, NY.

Yoh, H., & Kim, M.-S. (2024, August). Temporal Structure in Visual Working Memory: Absolute or Relative? Poster presented at *the 78th Annual Conference of the Korean Psychological Association*, Gyeongju, Republic of Korea. – Recipient of Best Poster Award

Yoh, H., & Kim, M.-S. (2024, February). Temporal Order Information in Visual Working Memory: Absolute or Relative? Poster presented at *the 2024 Annual Conference of the Korean Society for Cognitive and Biological Psychology*, Seoul, Republic of Korea.

HONORS & SCHOLARSHIPS

Honors & Awards

2024 *Best Poster Presentation Award*
78th Annual Meeting of the Korean Psychological Association

2022-23 *Highest Honors for Academic Achievement*
Yonsei University (Fall 2021, Fall 2022)

2021 *Honors for Academic Achievement*
Yonsei University (Spring 2021)

Scholarships

2023-24 *International Student Support Assistant Scholarship*
Yonsei University (Fall 2023, Fall 2024)

Teaching Assistant (TA) Scholarship
Yonsei University (Fall 2023, Spring 2024)

Graduate Student Research Assistant (GSRA) Scholarship
Yonsei University (Spring 2023, Fall 2024)

2021-22 *Yonsei Merit-based Scholarship*
Yonsei University (Fall 2021, Spring 2022, Fall 2022)

ASSISTANCE EXPERIENCES

Teaching Assistant

Experimental Methodology in Psychology (Undergraduate Course, 2023)

- Facilitated TA sessions in English, guiding students in designing and executing research projects
- Advised groups on topic selection, experimental design, and statistical analysis during regular TA meetings

Cognitive Psychology (Undergraduate Course, 2024)

- Supported instruction by designing and administering assessments

Graduate Student Research Assistant (2023 – 2024)

- Oversaw the lab's administrative operations, including budgeting, documentation, and communications

BK21 (Brain Korea21) Program Research Assistant (2025)

- Compiled departmental data and drafted Yonsei University's annual evaluation report

International Student Support Assistant (2023 – 2024)

- Provided academic support to international psychology students through advising, one-on-one meetings, and supplemental sessions

ACADEMIC & COLLABORATIVE ACTIVITIES

Lab-based Learning Activities

Journal Club (2023 – 2024)

- Participated and organized journal clubs on key topics in cognitive psychology by reading and presenting selected papers over a 7-week period, followed by group discussions

Python & MATLAB Study group (2023 – 2024)

- Studied the basics of Python and MATLAB through programming tasks and experiments
- Designed a structured template of experiment code and analysis pipeline, enabling peers to adapt it for their own projects

***Chat but Better* – English Research Discussion Group** (2025)

- Joined an English-only research discussion with graduate students across psychology subfields
- Presented research, participated in discussions, and practiced academic communication in English

***CogSci:IN* – Undergraduate Cognitive Science Association** (2022)

- Engaged in and presented at interdisciplinary seminars on key issues in cognitive science
- Collaborated on designing and executing cognitive psychology studies as a research project

SKILLS

Statistical Analysis

- Data preprocessing, statistical analyses, and visualization using **R, JASP, and Python**
- **Bayesian modeling**: GLMM, model comparison, GAM, and segmented regression

Experimental Stimuli Design

- Designed and conducted a range of cognitive tasks using **PsychoPy**
- Controlled and normalized visual features using **MATLAB**

Machine Learning & Data Analysis (Python & Jupyter Notebook)

- Applied machine learning methods (PCA, SVM, clustering, random forest)
- Analyzed open-ended text responses through tokenization, embedding, and network modeling
- Conducted facial recognition and emotion classification using RetinaFace and DeepFace

Language

- Korean (Native), English (Fluent)
